Product Full Name: Turtle Wax Wet n Black Tyre Foam

Long form Description:

Turtle Wax Wet 'N' Black Tyre Foam is the simplest way to clean, deep black wet looking tyres! The 2-in-1 foam formulation will firstly lift away dirt and grime from the tyre surface and then leave your tires with a rich black luster and a long-lasting protective barrier. The formula is a blend of silicone polymers that form a tight uniform layer of protection to help preserve and protect tires from premature drying and cracking. Just spray it on and walk away, no wiping required! The active foam formula will dissolve and disappear in minutes. Drive away with assurance of no messy tyre sling marks.

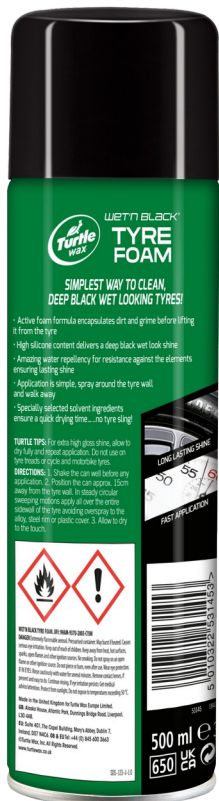

Short Description:

Turtle Wax Wet 'N' Black Tyre Foam is the simplest way to clean, deep black wet looking tyres! The 2-in-1 foam formulation will firstly lift away dirt and grime from the tyre surface and then leave your tires with a rich black luster and a long-lasting protective barrier. Just spray it on and walk away, no wiping required! The active foam formula will dissolve and disappear in minutes. Drive away with assurance of no messy tyre sling marks.

5 Bullets:

- Active foam formula encapsulates dirt and grime before lifting it from the tyre.
- High silicone formulation delivers a deep black wet look shine!
- High water repellence for resistance against the elements ensuring lasting shine!
- Application is simple, spray around the tyre wall and walk away.
- Solvent ingredients ensure a quick drying time.....no tyre sling!

Product Usage

How To Use:

1. Shake the can well before any application.
2. Position the can approx. 15cm away from the tyre wall. In steady circular sweeping motions apply all over the entire sidewall of the tyre avoiding overspray to the alloy, steel rim or plastic cover.
3. Allow to dry to the touch.

Turtle Tips:

For extra high gloss shine, allow to dry fully and repeat application. Do not use on tyre treads or cycle tyres.
